

Quantum Node Mesh

QNM-WP-1.0 · fabric concept at 100% · 2026-09-06 · Aziel Eliab · absorbs BUILD-1.0 + TOPO-1.0

A local process that stays on, hashes through radio failure, airlocks inbound, isolates poison, and never pretends the public Worker is that cell. Phoenix waits / re-seals after poison or isolation. Public tunnels and sites die with the pull. Tick and cite never share a socket.

2. Two planes

Plane	Default	Law
A — local qnm-node	Process ON. Bearers attempt.	Zero radios: process still ON, ledger appends. After a public pull the local node may keep verifying and appending. It does not climb back onto the hostname.
B — public rollup	enabled=false. GET never enables.	Counts only while the public surface exists. Sites pulled → rollup down (die with the pull). Phoenix does not restore this plane.
Tick socket	0.5–1s	Presence + tip hash only. Fixed-size. No body / diff / file.
Cite / payload	receiver-pull	Never sender fan-out push. 777s dwell after valid cite. Not wait-then-accept.

8. Bridge rotation and phoenix

Phoenix: wait / re-seal after poison or isolation. No controller hunt. Does not restore a public hostname, .uk, Cloudflare tunnel, Worker, or public rollup. Neighbors do not phoenix because a neighbor did.

10. Split the wires

Fast tick (0.5–1s): presence + tip hash only. Fixed-size. No body / diff / file on that socket. Payload is a second plane the receiver PULLS — never sender fan-out push. Update is a proof, not a timer: cite prev + lockset, fail-closed verify. 777s is dwell after a valid cite, not wait-then-accept. Clock desync ≠ yes. Ambiguous tip = isolate, not merge. Same prev, two tips from one node → lock / isolate that peer. No vote-to-reconcile. Quorum cannot outvote a broken hash. Announce tip only after own verify. Split brain keeps separate chains; no auto-splice. Rejoin = cite + operator / lockset. Heartbeat loss ≠ poison and ≠ apply last packet. The 1s loop and the 777s gate never share a socket.

11. Never / close tests

- Do not read Phoenix as “bring the .uk / public node back.” Sites pulled → public rollup down.
- Do not put a body on the tick socket. Do not fan-out push payload. Do not wait-then-accept.
- Do not vote-to-reconcile. Do not auto-splice a split brain. Do not phoenix a neighbor.

Public identity: Aziel Eliab only.

If the files hold, the name was never the point.
